# Banque Audi Suisse

e-Banking

Welcome guide

# Thank you for becoming a new user of the e-Banking platform of Banque Audi Suisse.

This welcome guide will provide you with the information required **to start using your new access**.

What you need

To activate your e-Banking credentials, you should have received by email from the Bank the information below:

✓ **A link to activate your RSA token**

✓ **A unique login ID**
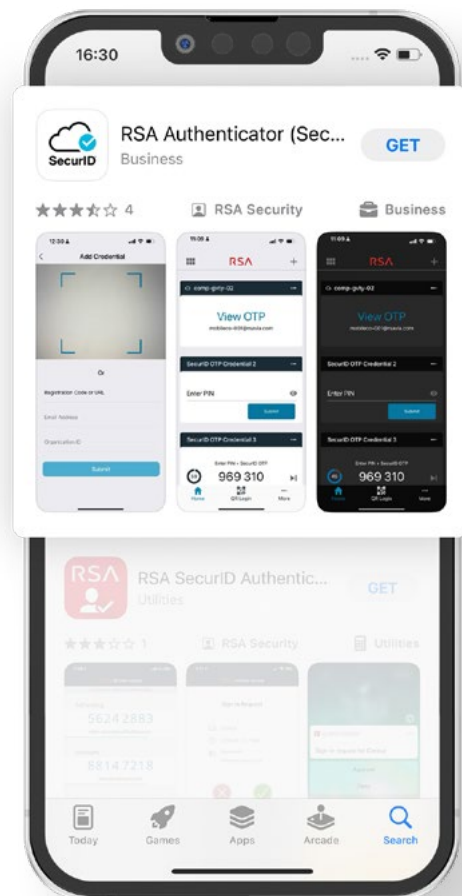

✓ **A secret password**

Link

Login ID & password

Installing the RSA Authenticator mobile app

On your mobile device, open the App Store or the Google Play Store.
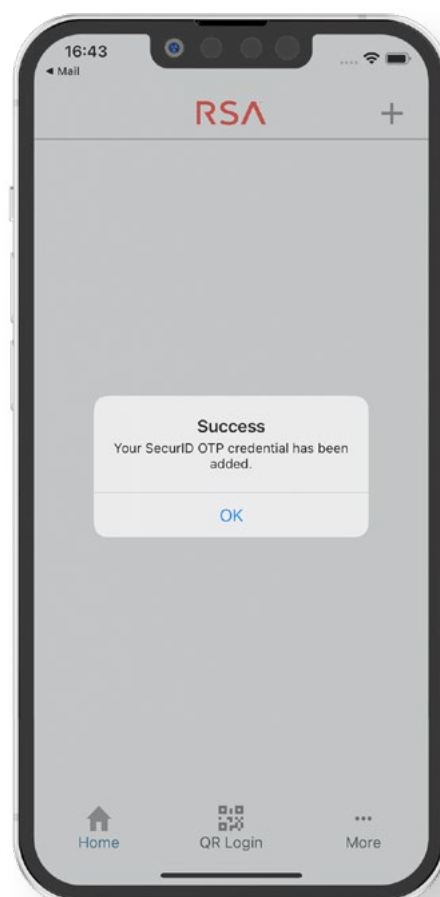

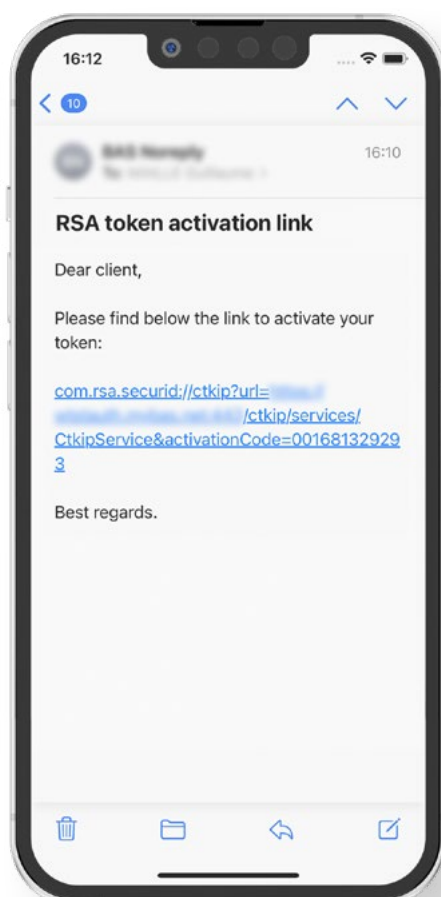

Search for **"RSA Authenticator"** and **install the app**.

Activating your RSA token

To activate your RSA token, open the email received from the Bank containing the activation link and **tap the link** provided.

Then, tap the "**OK**" button. **Congratulations**, you have successfully activated your RSA token!
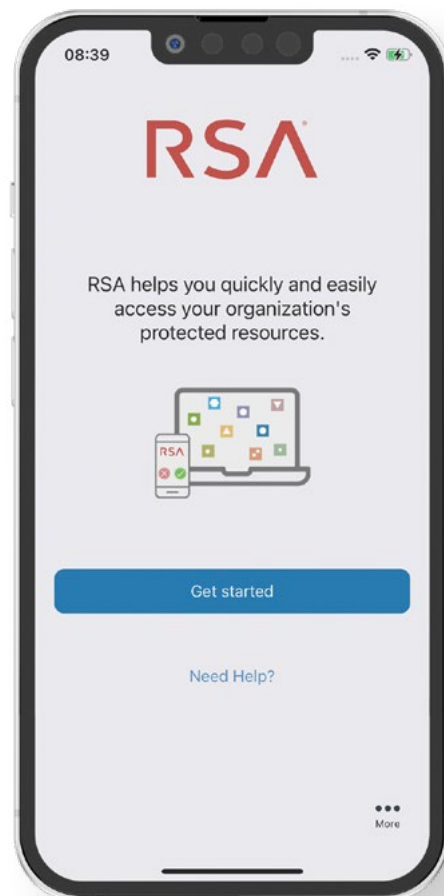

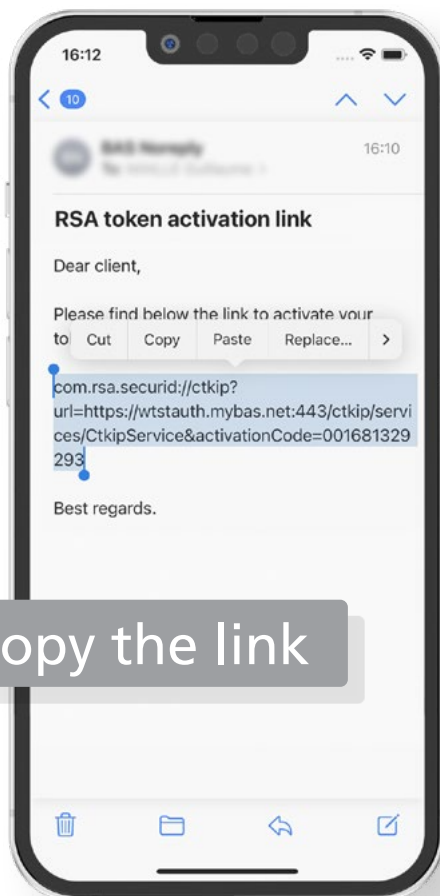

No active link? *.*

The link is not active 1/2

In case the link is not active, **copy the whole text of the link**.

Once the link is copied, open your RSA Authenticator mobile app and tap the "**Get started**" button.

Copy the link

The link is not active 2/2

In the next screen, paste the link in the "**Registration Code or URL**" field and tap the "**Submit**" button.

**Congratulations**, you have successfully activated your RSA token!

How to use your RSA Authenticator mobile app?

The RSA Authenticator mobile app provide a code required in the authentication process to access your e-Banking account.

During this process, you will have to enter the RSA token code in the e-Banking login page.

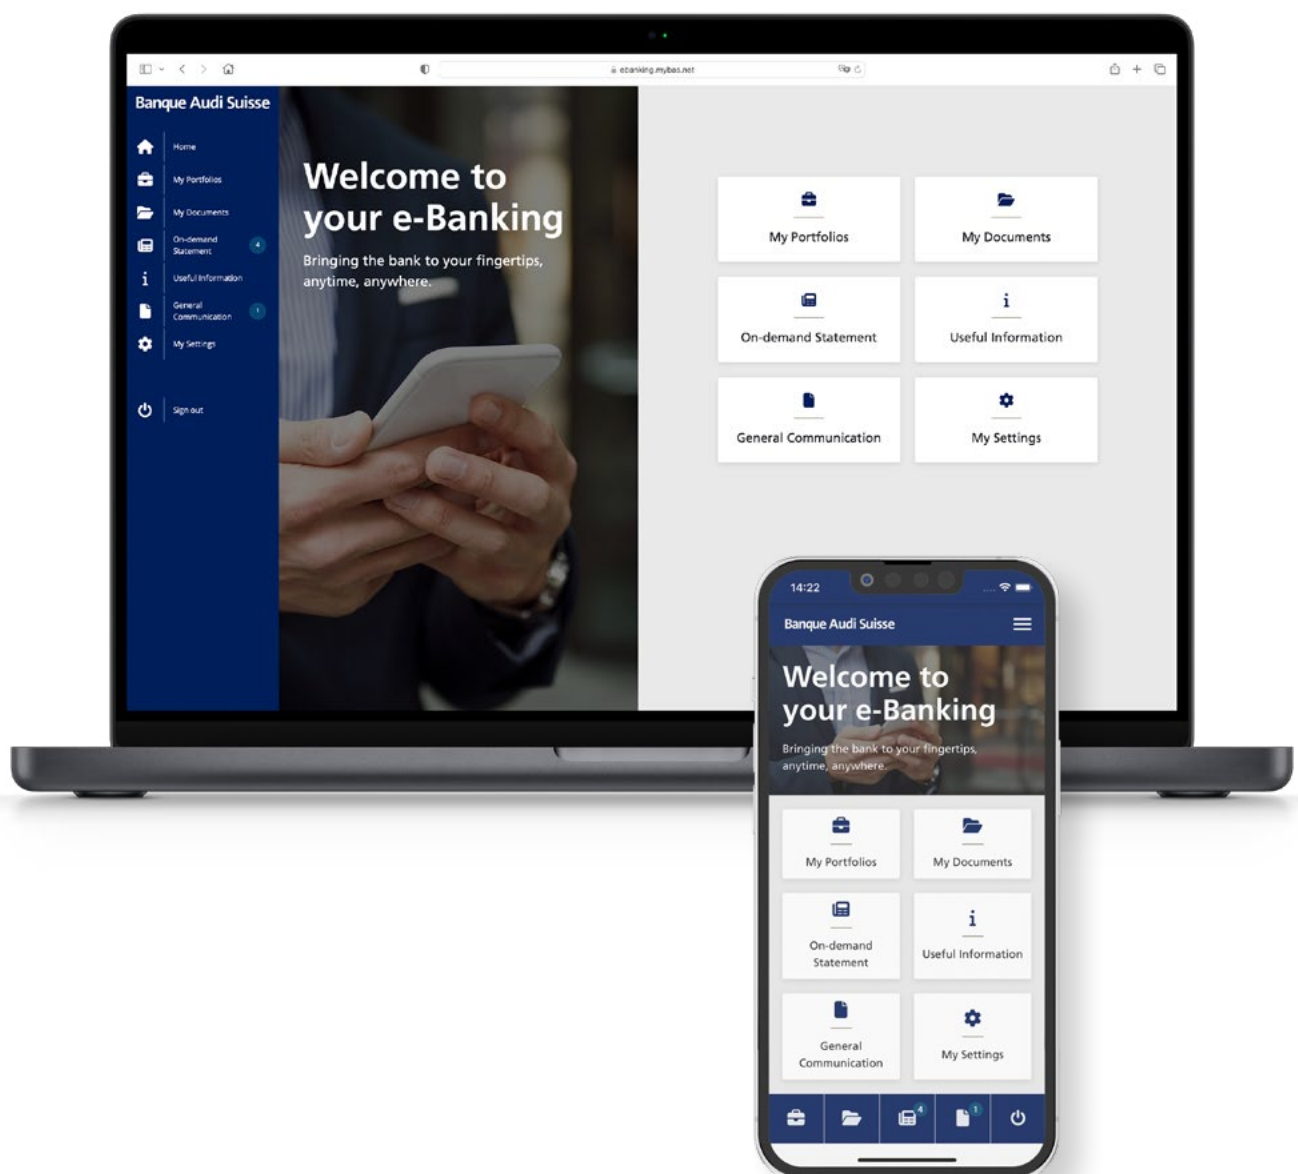

TIPS

Please be aware that a code has a **60 second duration**. Wait for a new code to be generated before using it.

E-banking channels

E-banking is available as a **mobile app** or through your usual **Internet browser**.
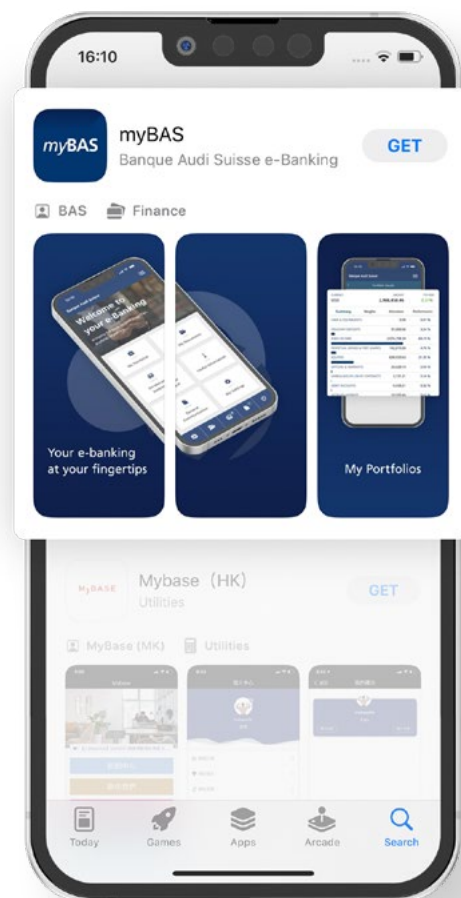

Installing your myBAS mobile app

On your mobile device, open the App Store or the Google Play Store.
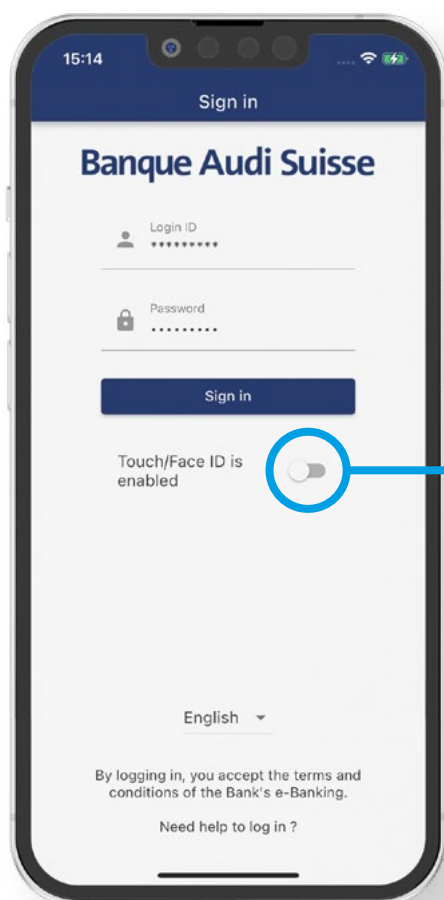

Search for "**myBAS**" and **install the app**.

Connecting to your myBAS mobile app

To connect to your myBAS mobile app, you need the unique **login ID** and the secret **password** received by **email** from the Bank.

Open your **myBAS mobile app**. Then, enter your unique login ID and your secret password.

TIPS

To simplify your future access, you can enable your **Touch ID or Face ID** service by activating the button.

Connecting to your myBAS mobile app

Once completed, tap the "**Sign in**" button. Now, you must enter a **code** generated by your RSA Authenticator mobile app.

Open your **RSA Authenticator mobile app**, wait for a new code to be generated.

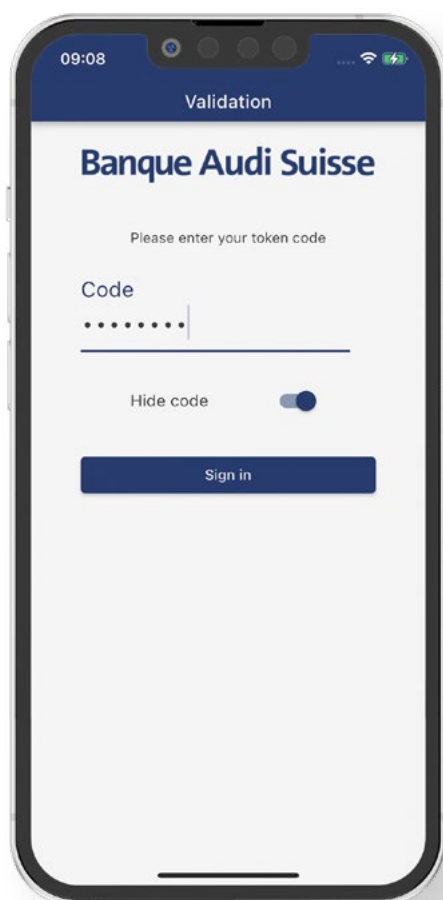

TIPS

To copy the code, press the number once. You will then receive the message "copied".

Connecting to your myBAS mobile app

Return to your myBAS mobile app and **enter (or paste) the code** in the required field. Then, tap the "**Sign in**" button.
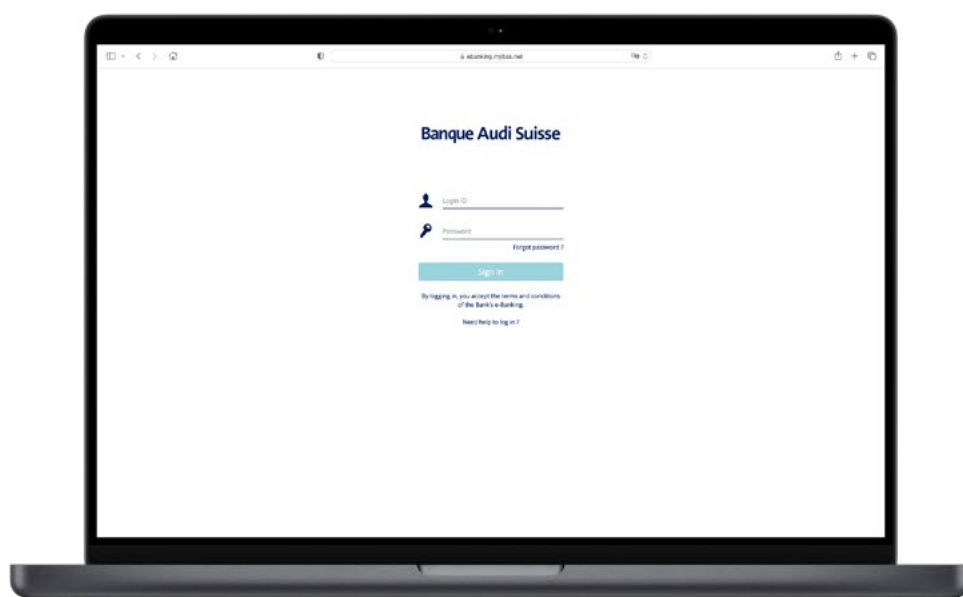

Congratulations! You have successfully accessed your e-Banking account!

Accessing the e-Banking with your usual Internet browser

On your computer, open your usual Internet browser. In the search bar, **enter the e-Banking address**:

In the login page, enter your unique **login ID** and your secret **password**. Then, click the "**Sign in**" button to validate.

Accessing the e-Banking with your usual Internet browser

Now, to get a RSA token code, open the **RSA Authenticator mobile app** and wait for a new code to be generated.

Return to your computer and **enter the code** in the required field. Then, click the "**Sign in**" button.

Congratulations! You have successfully accessed your e-Banking account!
